Peer portfolio reallocations

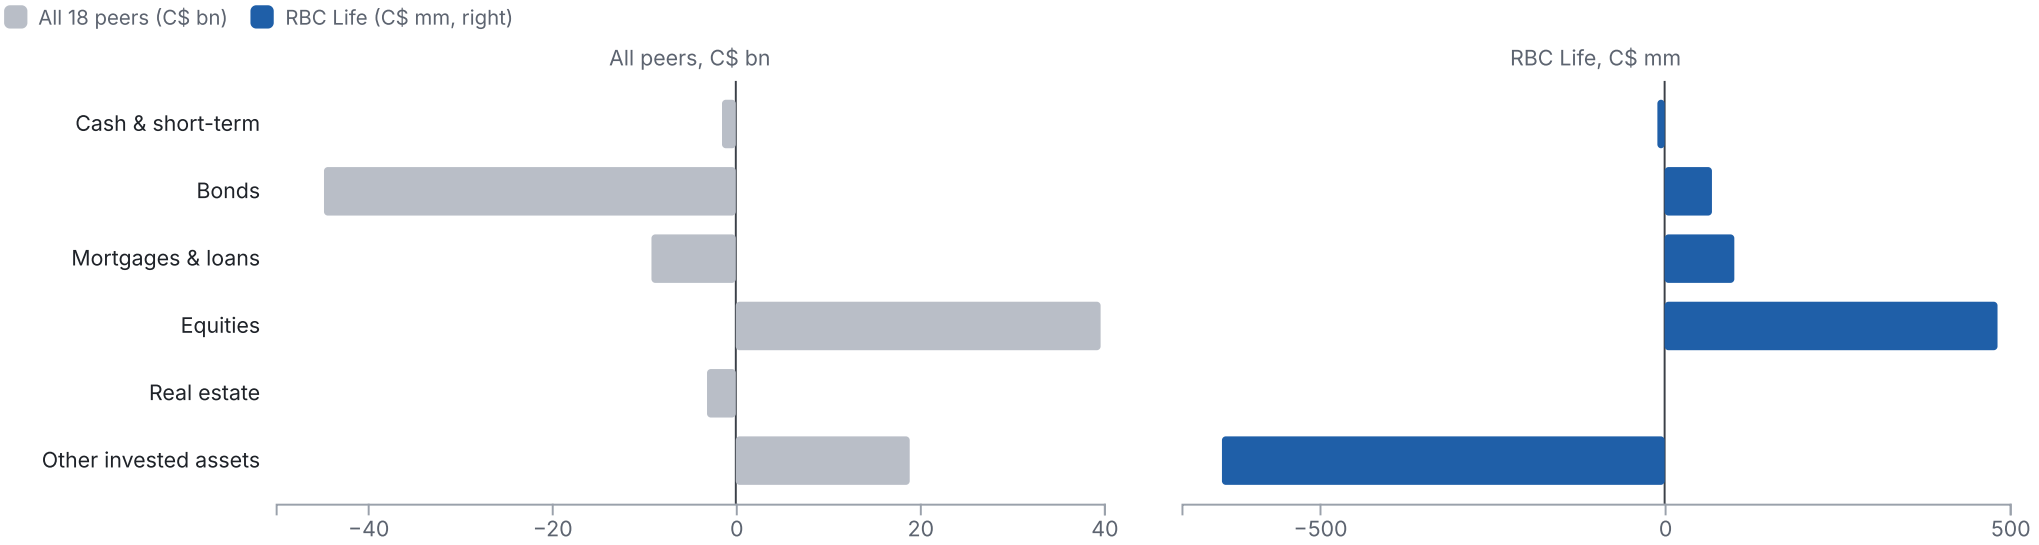

From Q1 2020 to Q2 2026 the peer set moved a net **C$44.7 bn** out of bonds and put **C$39.6 bn** into equities and **C$18.9 bn** into other invested assets (mostly alternatives), counting only quarters free of the IFRS 17 switch and corporate events. RBC Life's equity share went from **9.4%** to **12.5%** (peer median now **10.0%**) while its other invested assets fell from **5.5%** to **2.1%**.

General-account invested assets of the 20 peers, quarterly for the 13 OSFI filers and iA, yearly for Beneva, Assumption Life, Humania and UV Insurance; Desjardins publishes no life-company breakdown. Policy loans, derivative assets, segregated funds and pass-through fund units are left out on both accounting bases. Share changes include market price moves: the market-drift split on the Flows tab is an estimate. RBC Life is highlighted throughout.

Overview

Net C$ reallocated by asset class, Q1 2020 to latest

Sum over every quarter (year for annual filers) of the change in share times invested assets, so it is money moved relative to keeping the mix constant. Quarters crossing the IFRS 17 switch (where restatement was material) and corporate events are left out.

Change in share since Q1 2020, net of series breaks (pp)

Each insurer from its first to its latest filing. Hover for the split between the reported change, the IFRS 17 switch, corporate events and the estimated market drift. Rows run largest to smallest by invested assets.

RBC Life against the peer range, share of invested assets by class

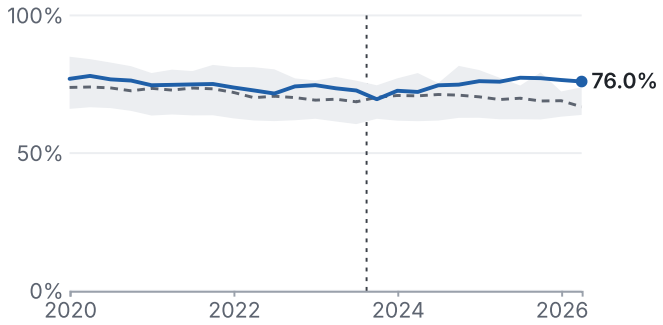

Quarterly filers only. The band is the middle half of peers (25th to 75th percentile), the dashed line their median; the dotted rule marks RBC Life's first IFRS 17 quarter (Q4 2023 on the calendar, its fiscal Q1 2024).

RBC Life — Peer median — Middle half of peers

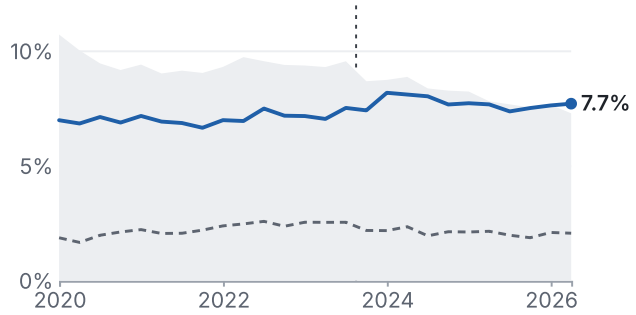

Cash & short-term

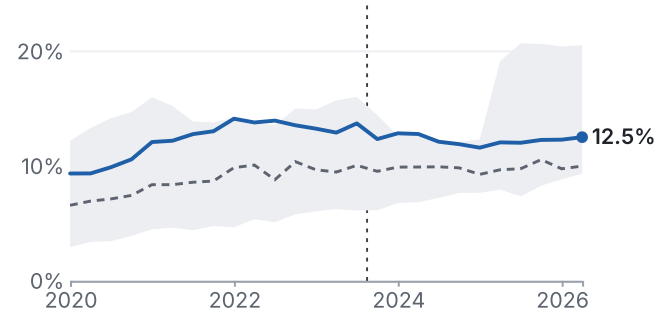

Bonds

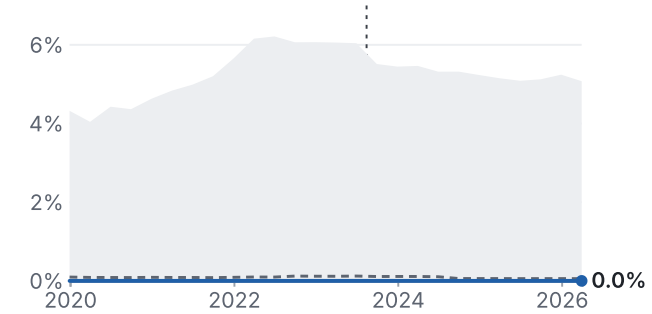

Mortgages & loans

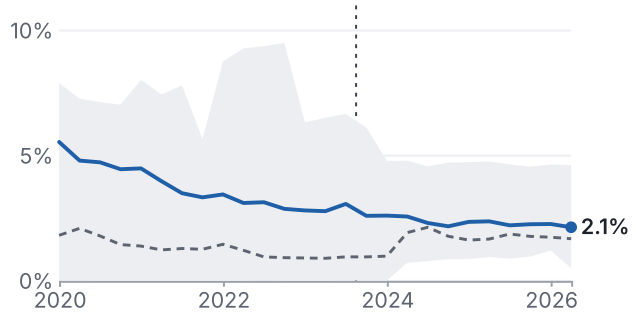

Equities

Real estate

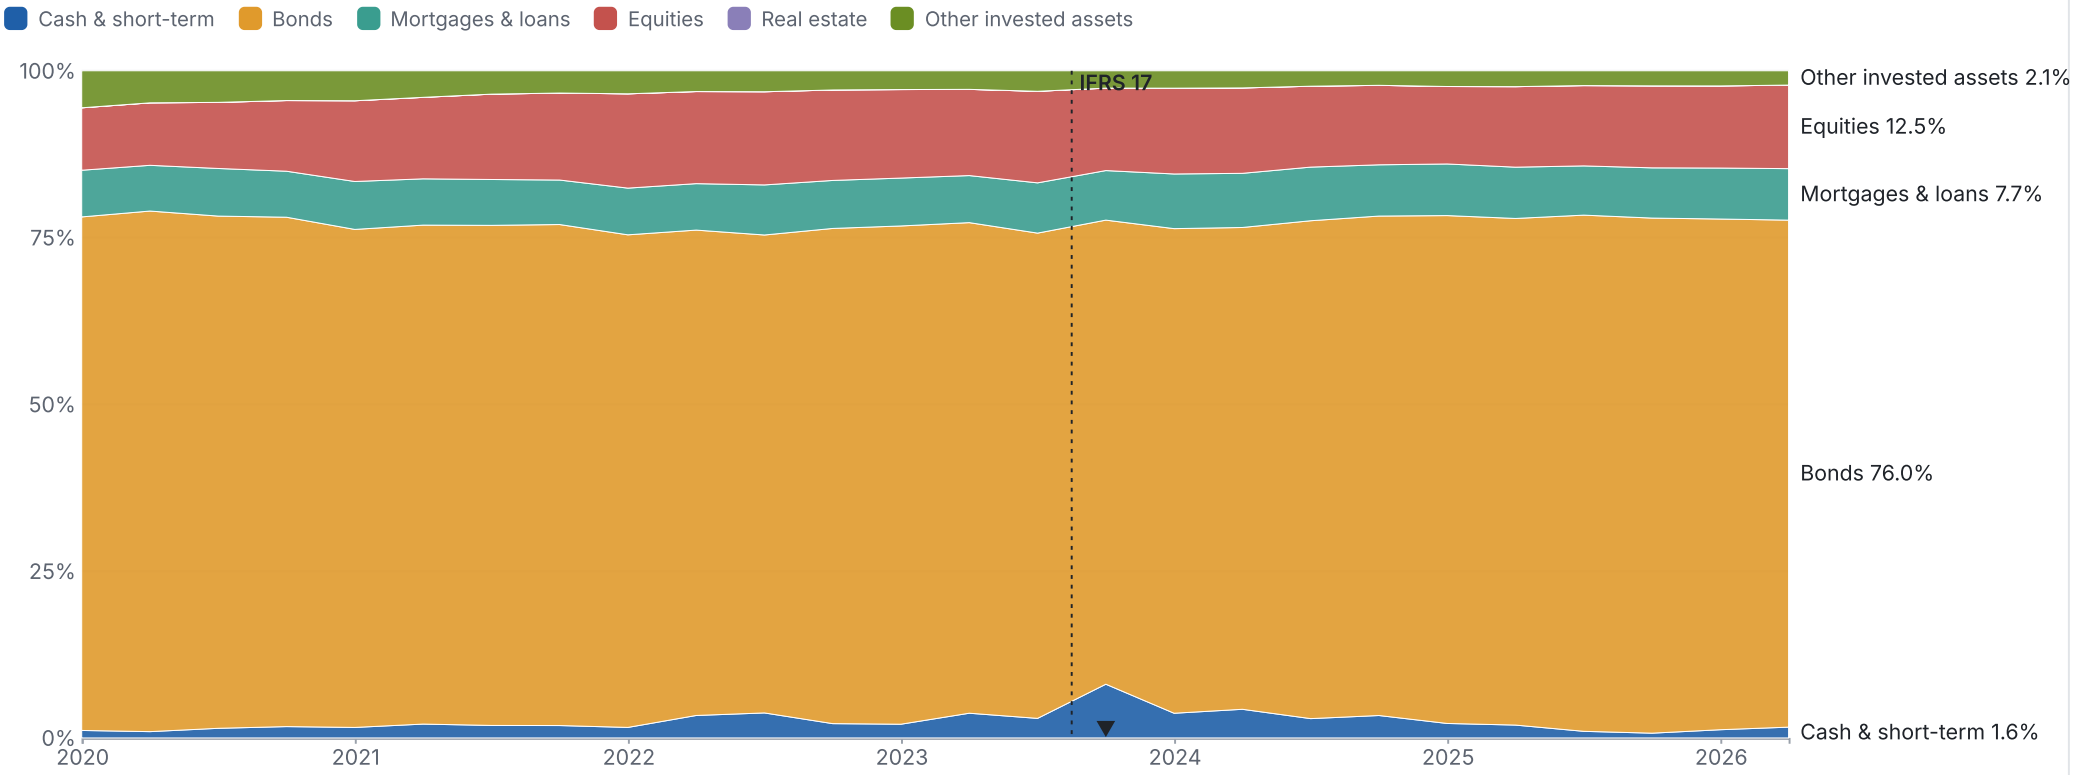

Other invested assets

RBC Life: mix over time

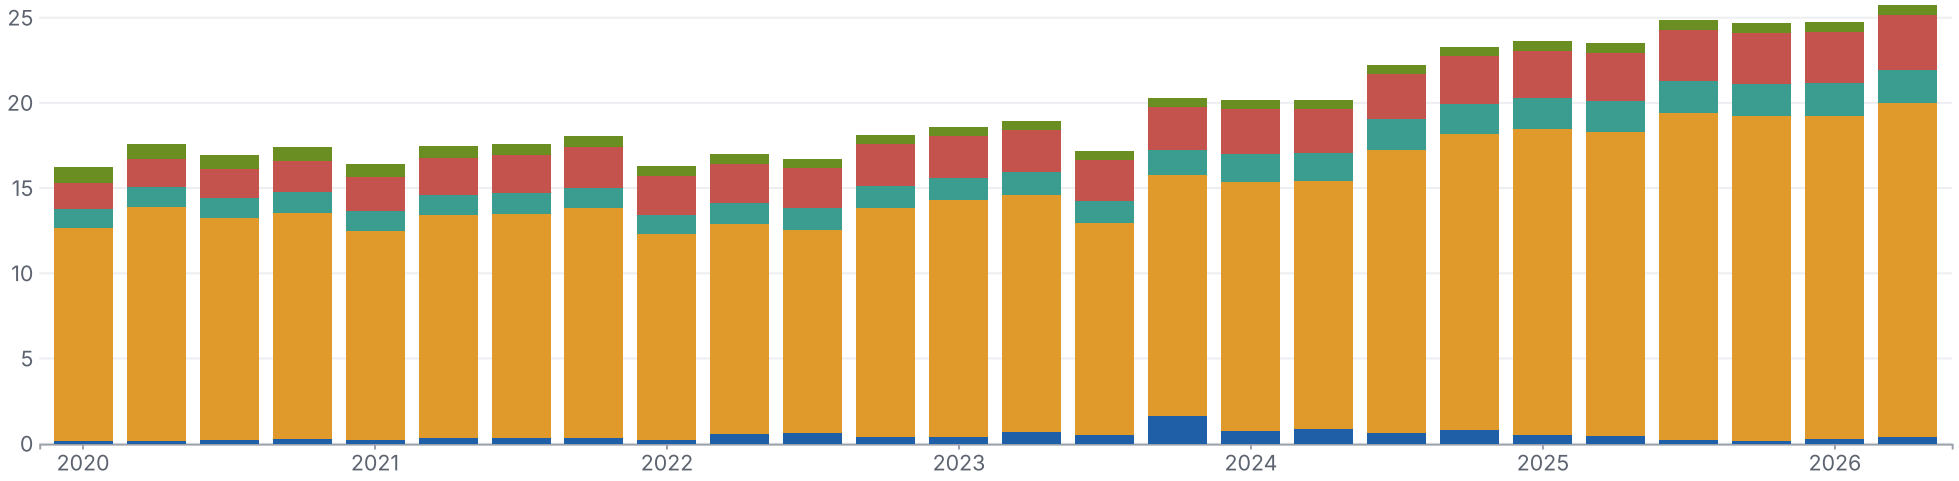

Share of invested assets by class

100% stacked. The dotted rule is the switch from IFRS 4 to IFRS 17 / IFRS 9; marked quarters carry a flag (switch, corporate event or a size jump) and are listed on the Series breaks tab.

Invested assets by class (C$ bn)

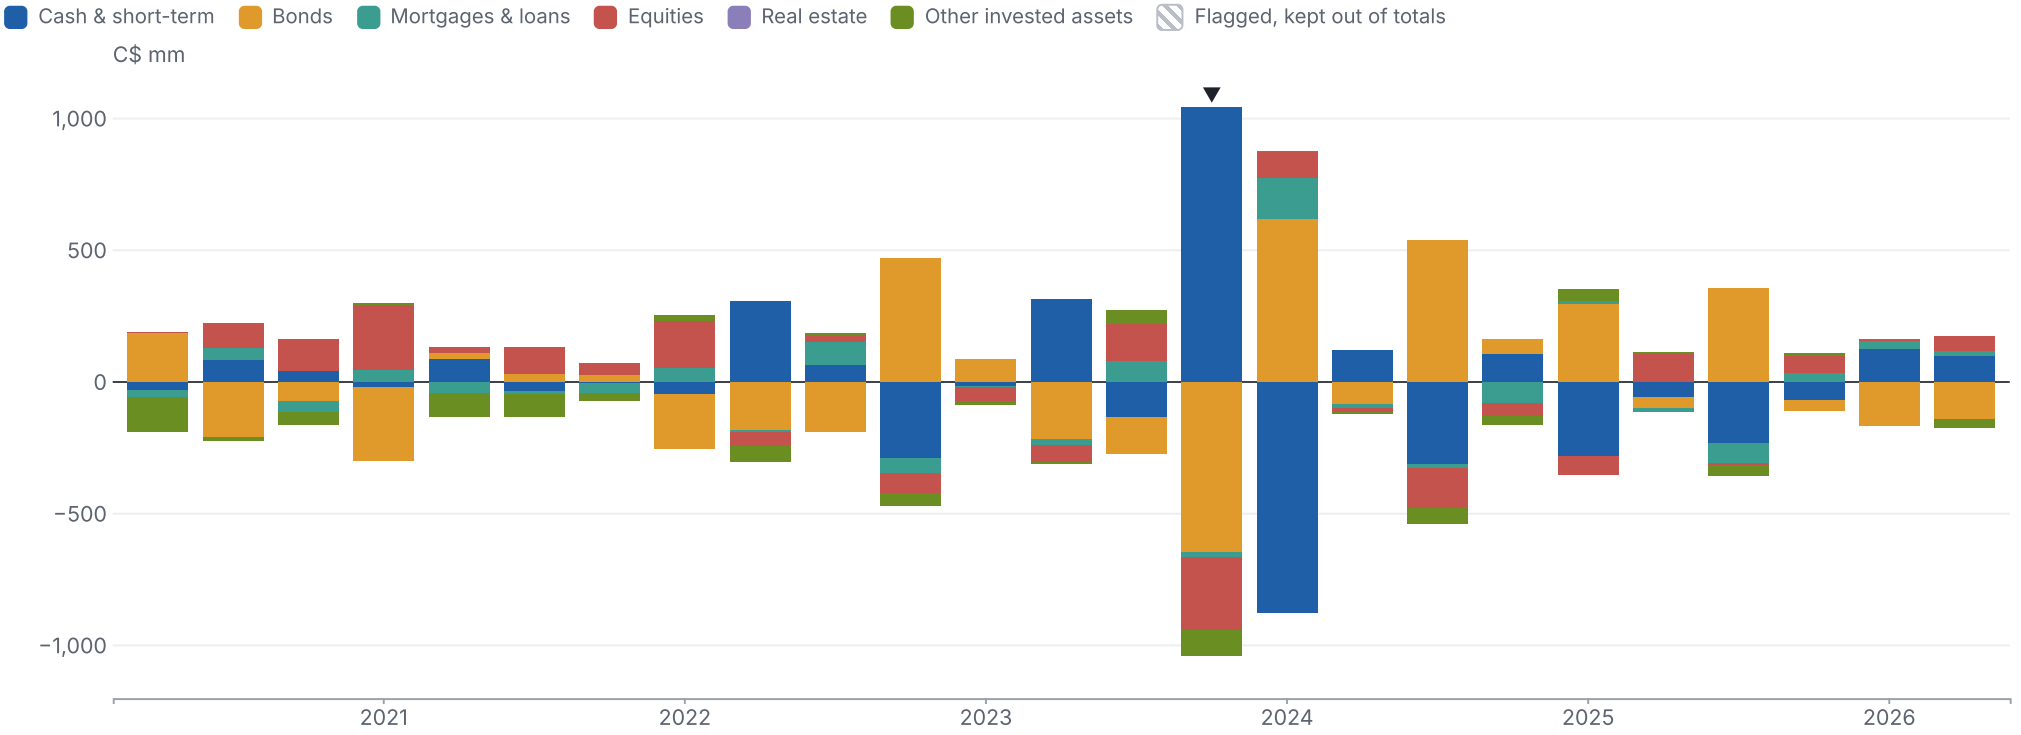

The same classes in dollars. For Manulife, Sun Life and Canada Life this is the Canadian insurer's legal-entity return, which consolidates foreign branches and subsidiaries, so C$ figures also move with exchange rates.

RBC Life: quarterly flows

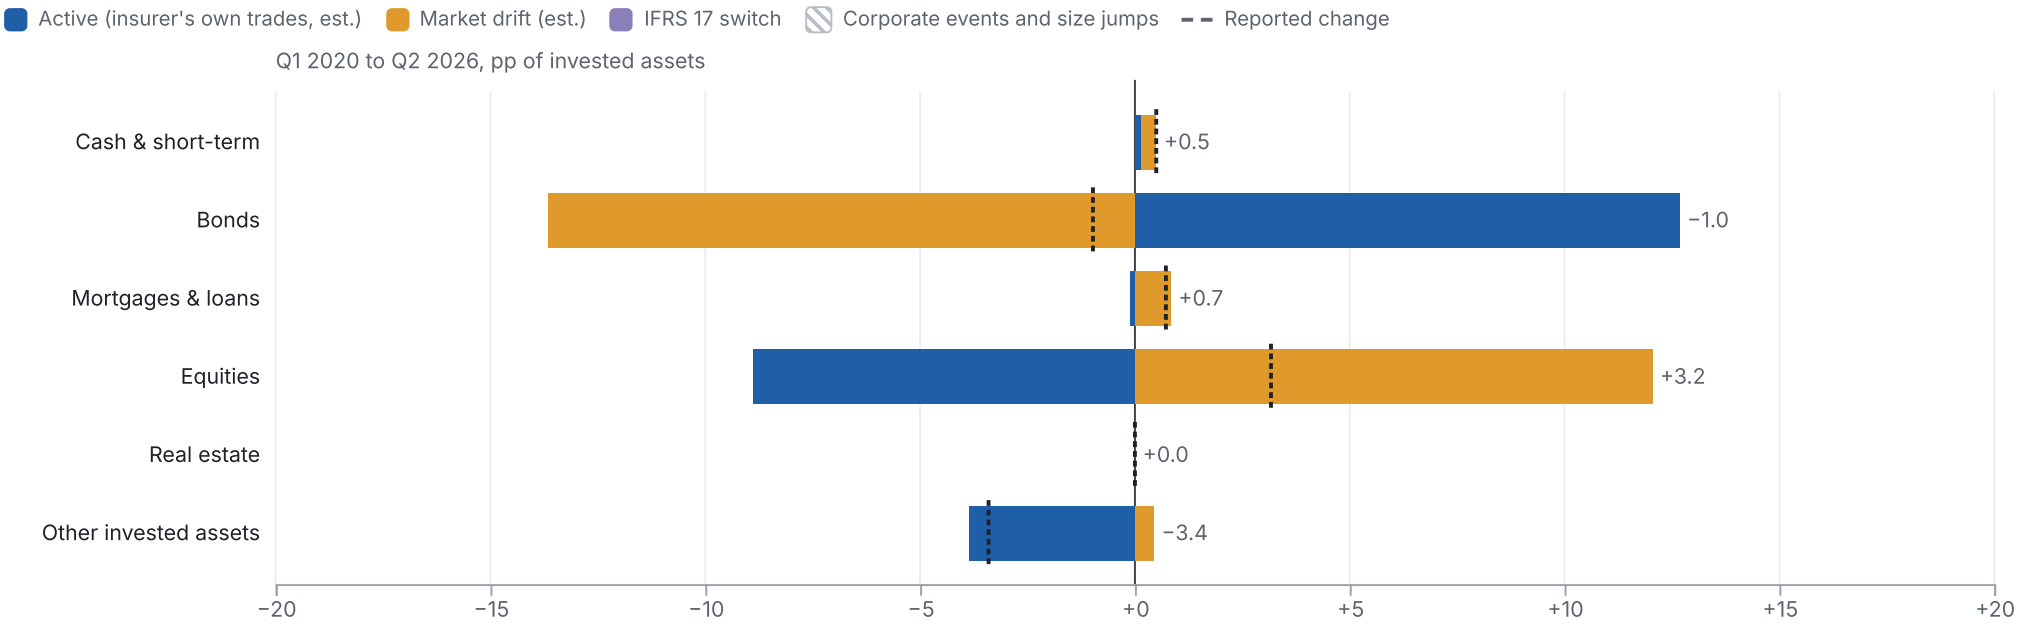

Reallocation each quarter by asset class

C$ reallocated is the change in share times invested assets at the end of the quarter: positive means the class grew faster than the portfolio. Hatched bars are flagged quarters kept out of the totals; for iA and Beneva only the restated part of the switch is removed.

What moved each class's share since the first filing (pp)

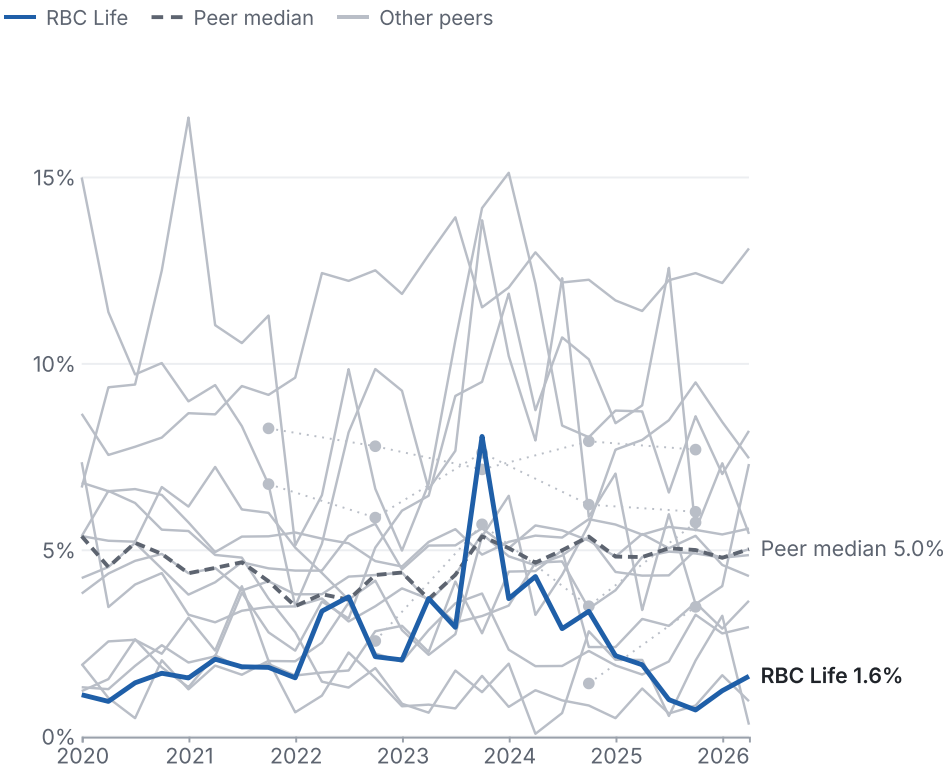

Reported change split into the IFRS 17 switch, corporate events and size jumps, an estimated market drift (bond prices repriced with the long Canada yield at a 10-year duration, equities with the S&P/TSX composite, other classes held flat) and the rest, which is the insurer's own buying and selling. The drift uses Canadian markets, so it is rougher for Manulife and Sun Life.

IFRS 17 detail: RBC Life

From 2023 the OSFI returns split bonds by issuer and credit grade and separate private placements, so the mix maps onto the CIO taxonomy's Level 3. iA comes from its quarterly packages. Annual filers are not shown here.

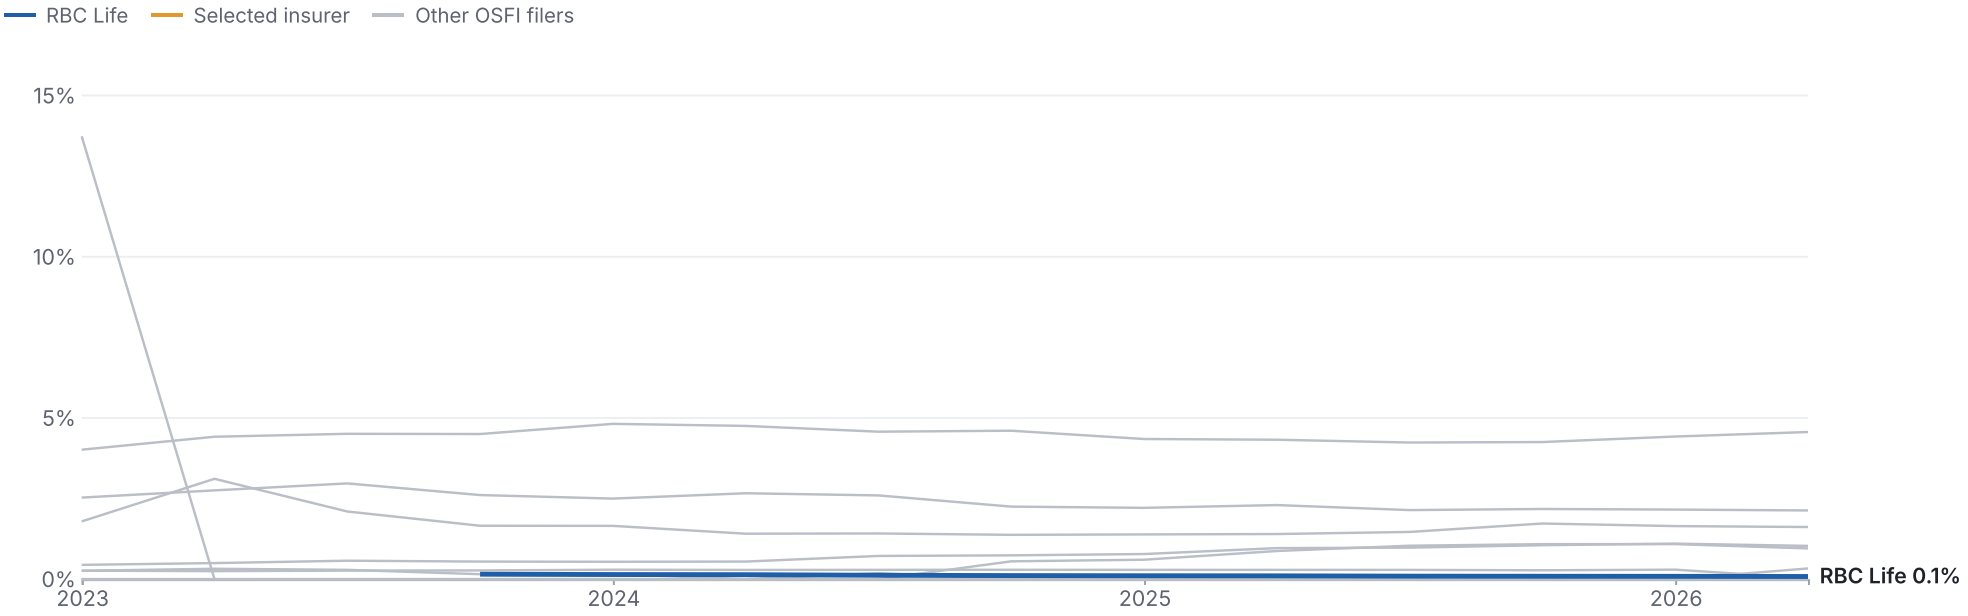

Level 3 share each quarter (%)

Rows follow the taxonomy (Level 1 / Level 2 in the label); the last column is the change from the first IFRS 17 quarter.

	23 Q4	24 Q1	24 Q2	24 Q3	24 Q4	25 Q1	25 Q2	25 Q3	25 Q4	26 Q1	26 Q2	Change

Below-investment-grade share of bonds

OSFI LF2 bonds rated below BBB- as a share of all bonds and debentures, OSFI filers only. Primerica Life's first LF2 return (Q1 2023) puts 13.7% of its bonds below investment grade and every later return close to zero, which looks like a classification change in the filing rather than a sale.

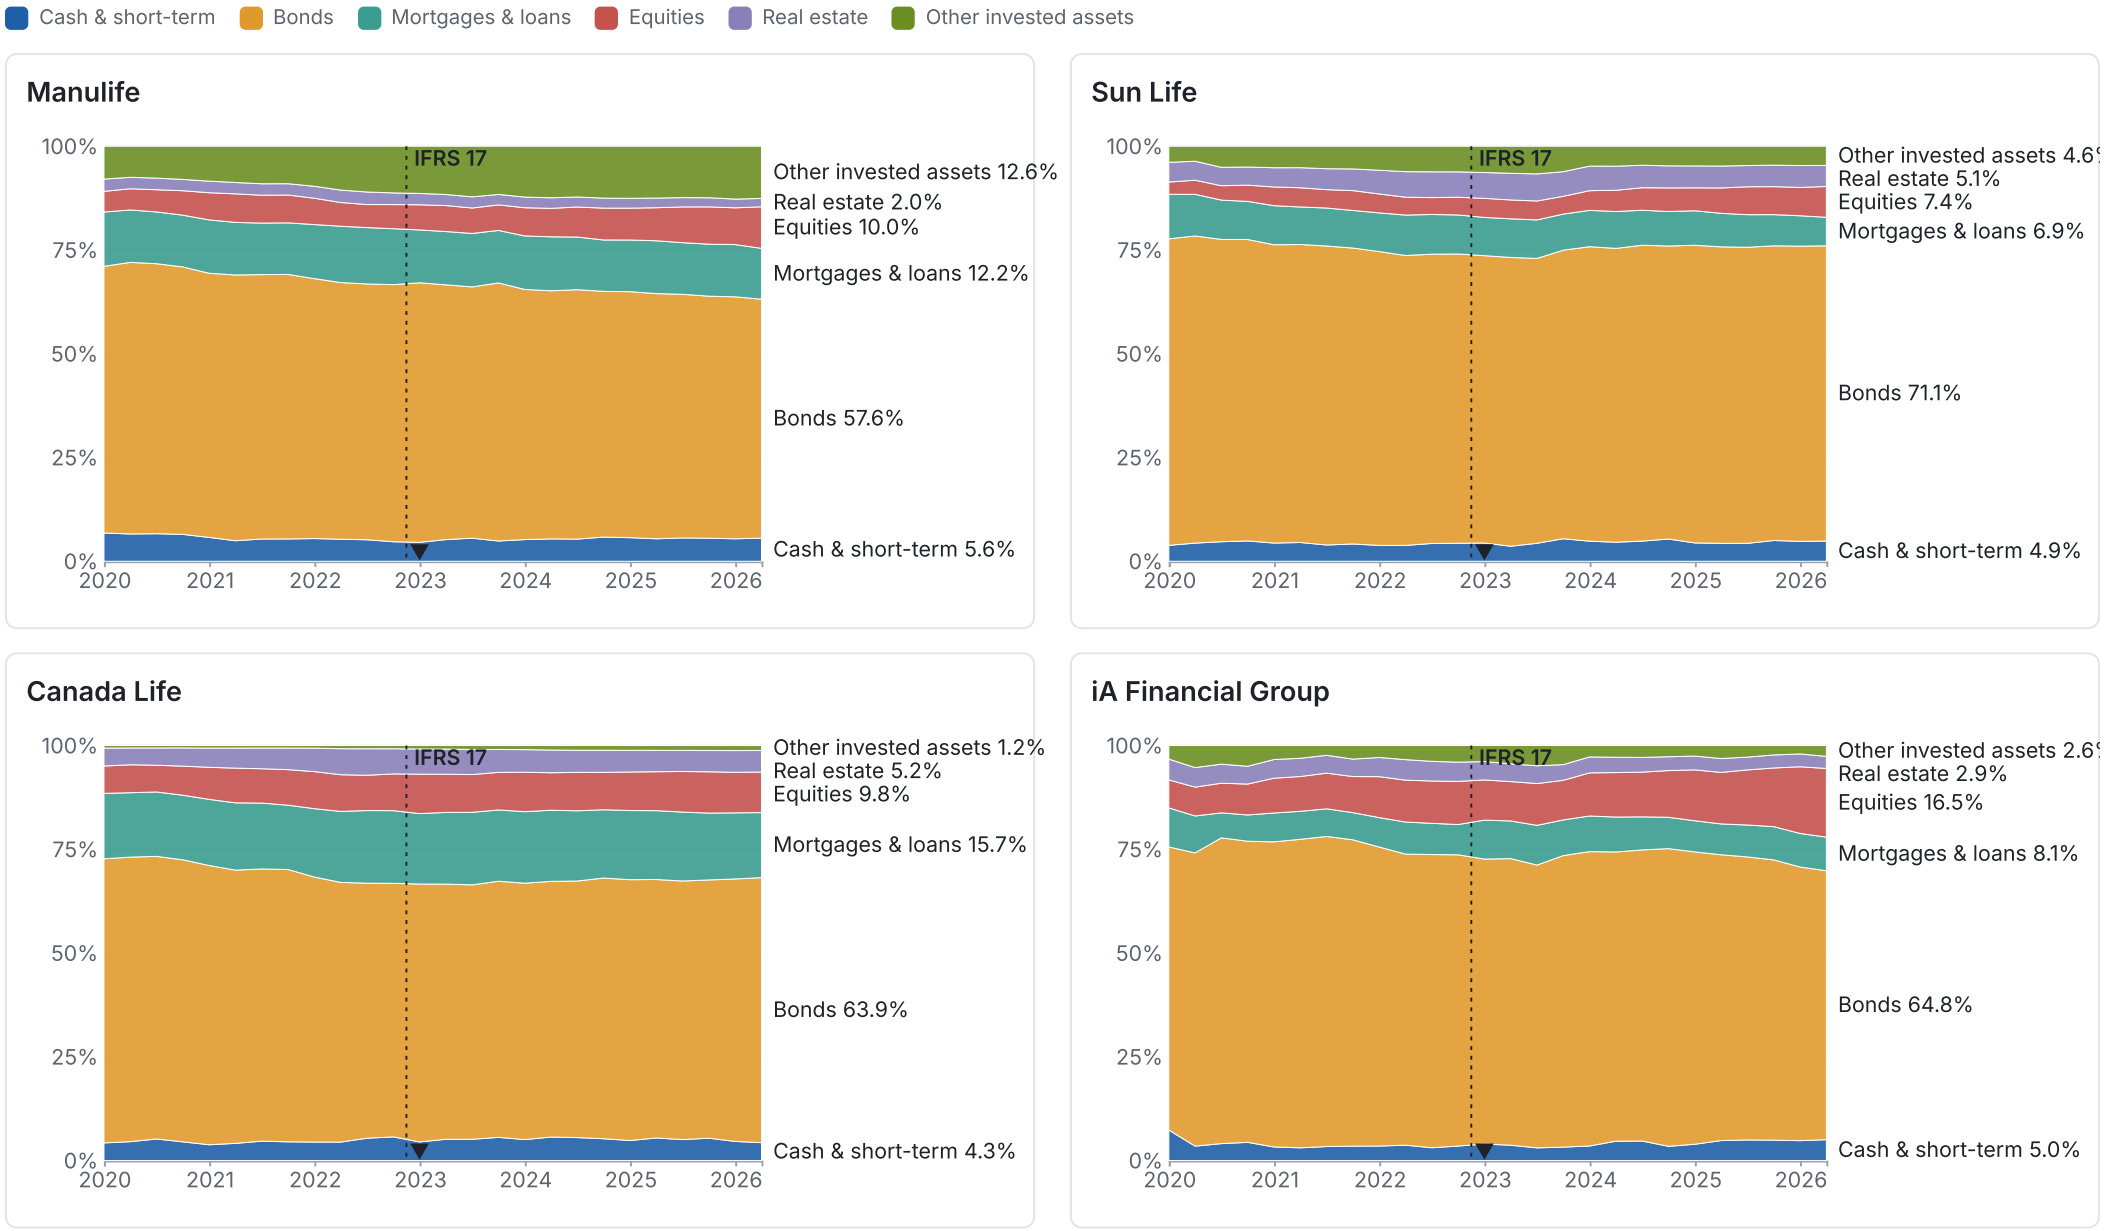

Change in Level 3 share since the first IFRS 17 quarter, every peer (pp)

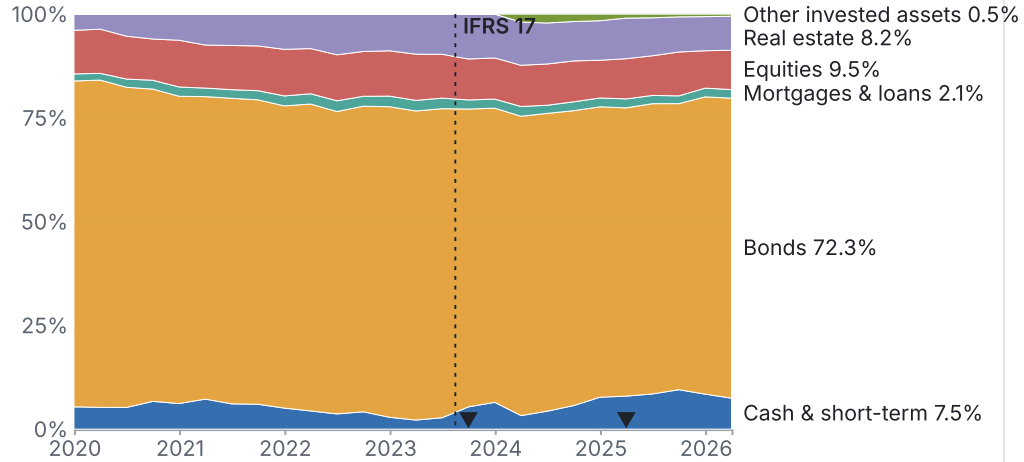

From Q1 2023 (Q4 2023 on the calendar for RBC Life and BMO Life) to Q2 2026. These quarters are all on one accounting basis.

Series breaks

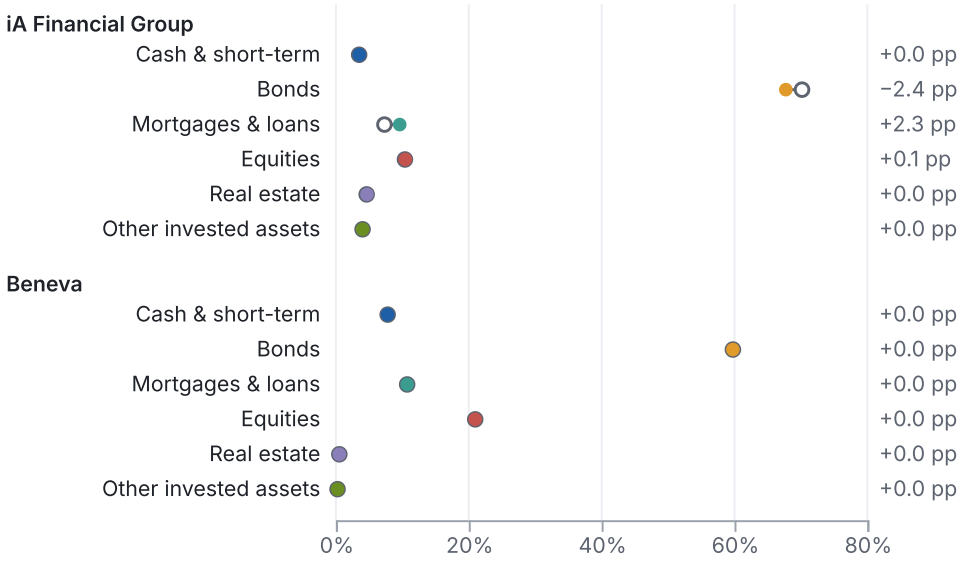

Restatement of the same balance sheet date, IFRS 17 / IFRS 9 against IFRS 4 (%)

Invested assets at the last IFRS 4 date as later restated, against the IFRS 4 figure, both without policy loans. Where it is under 1% the switch quarter counts as reallocation; where it is larger the quarter is left out; iA and Beneva restated by class, so only that part is taken out.

Where insurers restated by class, share at the same date (%)

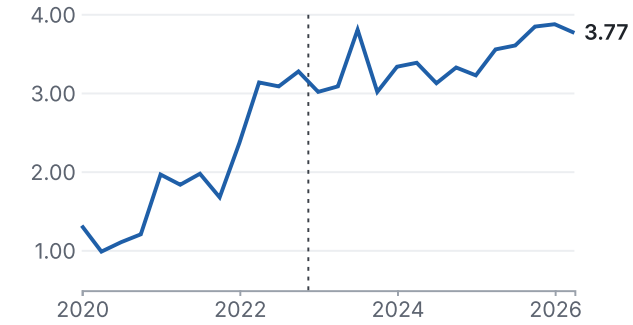

Hollow dot is the IFRS 4 share, filled dot the IFRS 17 restated share. Beneva's statement lines did not change; iA's bonds and loans moved by up to two points.

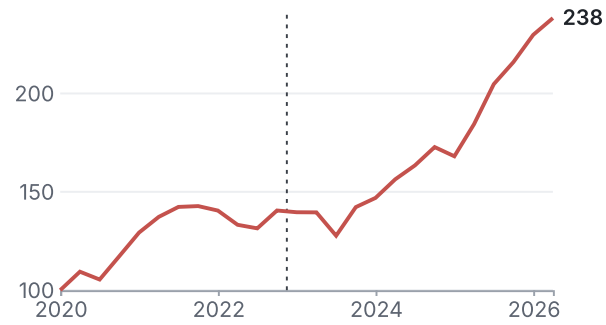

Market backdrop at each quarter end

Long Government of Canada benchmark yield (Bank of Canada) and the S&P/TSX composite indexed to 100 at Q1 2020. Rising yields shrink bond values and rising equity markets lift equity shares with no trading at all.

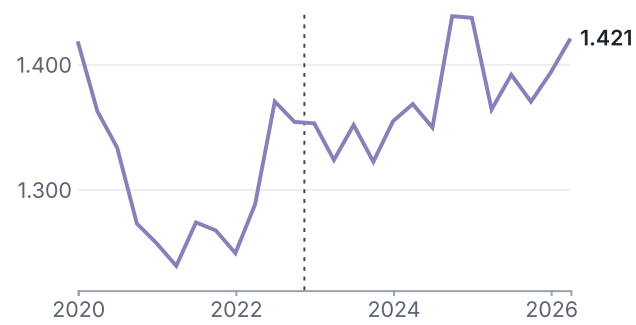

Long Canada yield (%)

S&P/TSX composite (Q1 2020 = 100)

USD/CAD

Flagged quarters

Every quarter where a series break or corporate event, rather than a portfolio decision, may explain the change.

Insurer	Quarter	Flag	Invested assets change	What happened and how it is treated
Manulife	Q1 2023	IFRS 17 switch	+1.1%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by -2.0%, so the quarter is kept out of the reallocation totals.
Sun Life	Q1 2023	IFRS 17 switch	−1.2%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by -3.1%, so the quarter is kept out of the reallocation totals.
Canada Life	Q1 2023	IFRS 17 switch	−0.2%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by -2.2%, so the quarter is kept out of the reallocation totals.
iA Financial Group	Q1 2023	IFRS 17 switch	+2.8%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. The insurer restated the 2022Q4 balance by class (-0.8% in total), so the restatement is taken out class by class and the rest counts as reallocation.
RBC Life	**Q4 2023**	**IFRS 17 switch**	**+18.3%**	**2023Q3 is the last IFRS 4 filing and 2023Q4 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only -0.1%, so the quarter's change is counted as reallocation (classification between the two returns may still differ). Invested assets moved +18% in the quarter.**
BMO Life	Q4 2023	IFRS 17 switch	+15.1%	2023Q3 is the last IFRS 4 filing and 2023Q4 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by +3.0%, so the quarter is kept out of the reallocation totals. Invested assets moved +15% in the quarter.
BMO Life	Q2 2025	Corporate event	−2.5%	Transferred about 200,000 policies to UV Insurance (assumption reinsurance, June 2025).
Beneva	Q4 2023	IFRS 17 switch	+6.7%	2022Q4 is the last IFRS 4 filing and 2023Q4 the first on IFRS 17 / IFRS 9. The insurer restated the 2022Q4 balance by class (+0.0% in total), so the restatement is taken out class by class and the rest counts as reallocation.
ivari	Q1 2023	IFRS 17 switch	+5.4%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by +1.5%, so the quarter is kept out of the reallocation totals.

Insurer	Quarter	Flag	Invested assets change	What happened and how it is treated
Empire Life	Q1 2023	IFRS 17 switch	+3.6%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only -0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
Equitable Life	Q1 2023	IFRS 17 switch	+3.1%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only +0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
Co-operators Life	Q1 2023	IFRS 17 switch	+3.2%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only -0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
UV Insurance	Q4 2025	Corporate event	+42.6%	Acquired about 200,000 BMO Life policies (assumption reinsurance, June 2025): the bond increase is mostly assets transferred with the block.
Wawanesa Life	Q1 2023	IFRS 17 switch	+2.5%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only -0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
Foresters Life (incl. Canada Protection Plan)	Q4 2021	Size jump	−19.1%	Invested assets moved -19% in one quarter, which points to a block transfer, reinsurance deal or capital move; kept out of the reallocation totals.
Foresters Life (incl. Canada Protection Plan)	Q1 2022	Size jump	−15.8%	Invested assets moved -16% in one quarter, which points to a block transfer, reinsurance deal or capital move; kept out of the reallocation totals.
Foresters Life (incl. Canada Protection Plan)	Q1 2023	IFRS 17 switch	+2.1%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only +0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
Canadian Premier Life	Q4 2020	Size jump	+30.3%	Invested assets moved +30% in one quarter, which points to a block transfer, reinsurance deal or capital move; kept out of the reallocation totals.
Canadian Premier Life	Q1 2023	IFRS 17 switch	+240.9%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only +0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ). Invested assets moved +241% in the quarter.
Primerica Life	Q2 2021	Size jump	−36.6%	Invested assets moved -37% in one quarter, which points to a block transfer, reinsurance deal or capital move; kept out of the reallocation totals.
Primerica Life	Q1 2023	IFRS 17 switch	+0.8%	2022Q4 is the last IFRS 4 filing and 2023Q1 the first on IFRS 17 / IFRS 9. Restating the same date moved invested assets by only +0.0%, so the quarter's change is counted as reallocation (classification between the two returns may still differ).
